## **BTICINO 344242 (2 WIRE)**

### Terminals

- 3 Bus
- 4 Bus
- Note : ID Pins are required

#### **IMPORTANT NOTE :**

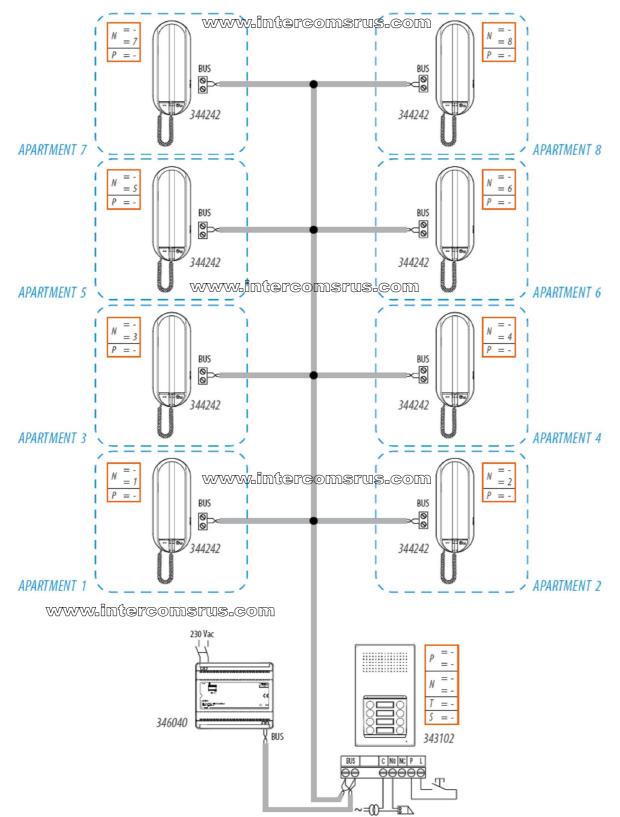

1) Before replacing the handset make note of the wires to each terminal on the existing unit (an easy way is to cut each core off leaving a piece of the insulation in place with colour visible) twist unused cores together (so you know they are not used, <u>do not</u> short them out).

2) Some older systems will have cable with one coloured core and a solid white core in this case mark each core with a marker or tape.

3) Some systems may have <u>loop on wiring</u>, you will have 2 cables into your handset (make sure any joins remain, as these may be serving other flats on the system).

# Wiring For Up To 100

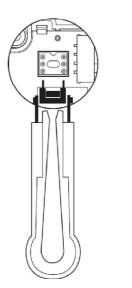

#### Configuration

The handset MUST be configured by physically connecting the configurators to the appropriate sockets as follows:

#### N - handset number

The N configurator assigns to each handset an identification number (1 - 99) within the system. The handsets must be configured in progressive order. In case of handsets with parallel connection (max 3), these must be configured using the same N configurator.

1. Modern and simple design

 Three door bell volume levels

3. Two pushbuttons:

- Door lock function
- Free for appplications (e.g. external light)
